

Magnetic Hysteresis Capping Headsets

Benefits

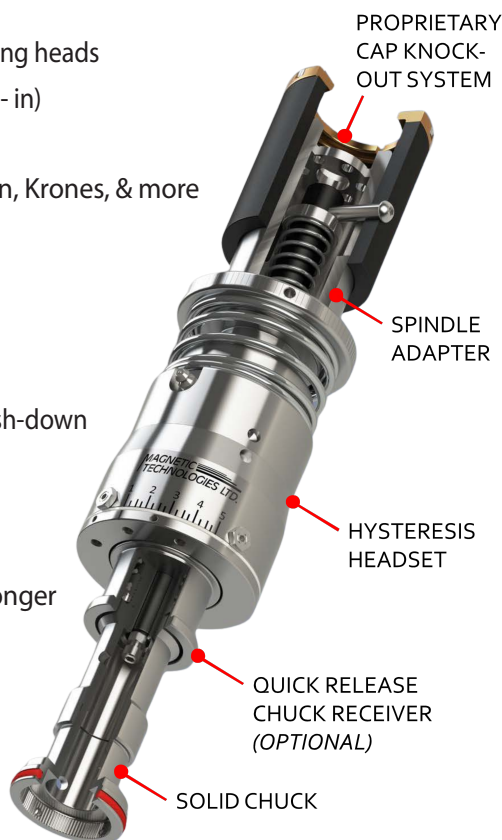

- Fast, accurate, repeatable setups
- Improved wear on cap chucks vs magnetic ratcheting heads
- Smooth consistent torque, ranging from 5 - 50 (lbs - in)
- 7000+ hour run time between rebuilds
- Retrofittable to many OEMs - Alcoa, AROL, Zalkin, Kronos, & more
- Maintenance free components
- Lifetime warranty on sealed magnet assemblies
- In-field or in-house refurbishment services

Features

- Fully sealed and designed to withstand caustic wash-down
- Simple accurate torque Adjustment
- Stainless steel Construction, including high-quality stainless-steel double row bearings
- Patented adjustable top-load with less wear for longer life
- Nickel plated, double encapsulated magnets

Double Encapsulated Magnet Packs

Zalkin Conversion from Gripper Chuck to one piece chuck for Gatorade

Partnership with Magnetic Technologies

Magnetic Technologies Capping Headsets for OEM Cappers

Septimatech has partnered with Magnetic Technologies to bring Customers long lasting, OEM interchangeable magnetic headsets for capping. Magnetic Hysteresis Technology allows for highly consistent, non-contact torque for precise, accurate, and repeatable cap tightening. The frictionless magnetic design ensures controlled torque application, eliminating variations and preventing over- or under-tightening during the capping process. Stainless steel design, sealed internals, & encapsulated magnets make headsets impervious to caustic washdown.

Since 1984 **Magnetic Technologies** has been designing and manufacturing high-quality permanent magnet hysteresis cap headsets & chucks.

With a lifetime warranty on sealed magnetic assemblies, Magnetic Technologies offers in-house or in-field refurbishment services to restore products to like-new condition, extending equipment life and reducing replacement costs.

Dairy Headsets for specialty Capper

Headsets & Cap Chucks for various applications are available.

Quick release options available.
