CHANGEOVER SOLUTIONS
TRENDS & INSIGHTS

2025

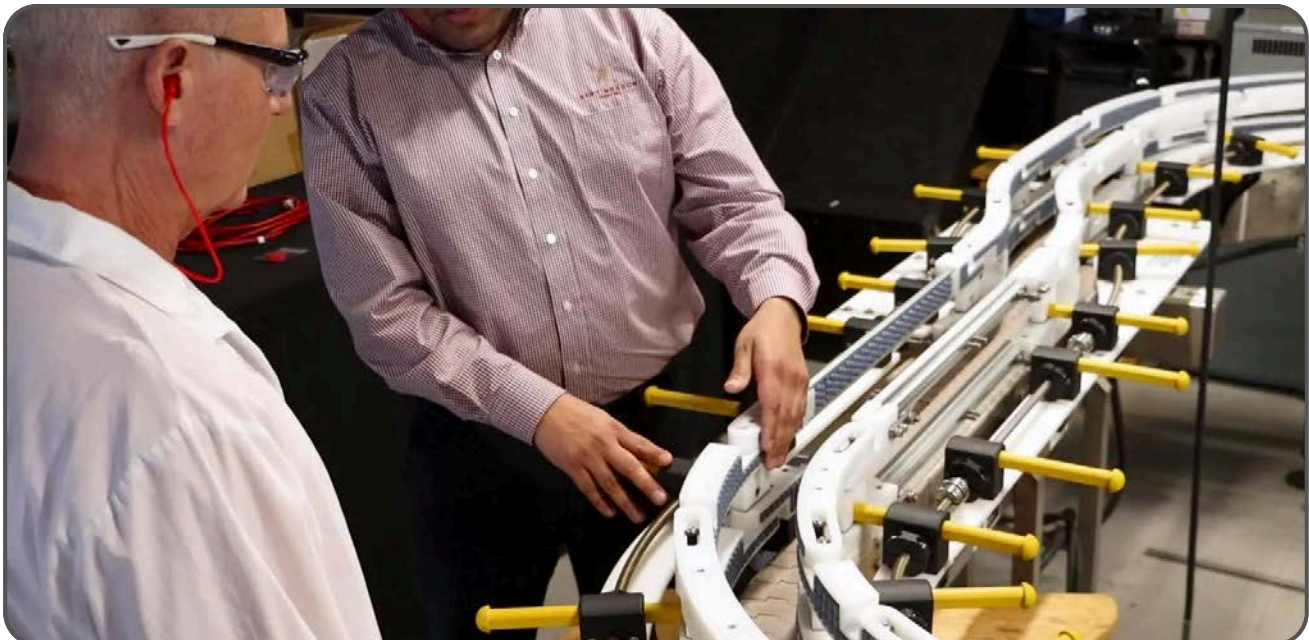

Suggestions from the perspective of a
Packaging line Changeover Solutions and
Container Handling specialist.

About Septimatech Group Inc.

Septimatech observes the unique trends of the packaging industry through the work we do with our Customers and how they are being impacted. A lot of these trends are driven by automation, sustainability, and operational efficiency. Global trends are also impacting our customers - factors like digitalization, eco-friendly packaging solutions, and flexible manufacturing are shaping the future of packaging lines. As our Customers strive to reduce downtime, increase throughput, and comply with sustainability regulations, the need for precision-engineered, simple changeover solutions has never been more critical.

With over 30 years of experience, Septimatech is an expert voice in changeovers on machine and lines. Renowned for our innovative, user-friendly designs and commitment to precision and reliability, we empower our Customers with repeatable, consistent, and fast adjustments that maximize productivity and reduce downtime. Our expertise in ergonomic and efficient solutions, such as Quick Change Parts, EASY Adjust Rails, Multi-Lane Guide Adjust Systems, Change Part Carts, and Feed Screws & Drives, allows packaging lines to seamlessly adapt to diverse products, formats, and sustainability requirements.

In 2025 by aligning our innovative offerings with these trends, we offer you **flexible, efficient, and automated solutions** that empower you to achieve **increased throughput, less downtime** on your packaging lines, and overall **higher productivity** for your operators.

Reducing Labor Shortages:

One constant theme among our customers is that **labor shortages are everywhere in the packaging industry** - OEMs (Original Equipment Manufacturers) Contract Packers, and CPGs (Consumer Packaged Goods) alike are struggling to find skilled labor to aid in keeping their productivity optimized for maximum output.

How can Septimatech help?

At Septimatech, we create automated solutions and remove variables for CPGs, Contract Packers, and OEMs which in turn will help address their labor shortages.

For OEM's:

As Changeover experts, we work with our OEM customers helping them reduce the amount of time they spend on designing the parts of their machinery that requires changeovers, like change parts and guides rails. This allows their engineers and techs to focus their time more closely on designing the machine's primary functions of filling, capping, and more.

For CPG's:

For our CPG and contract packagers customers, we help them focus on areas of their packaging lines that can be improved through quick changeover solutions and automation. We also focus attention on the changeover process as a whole, ensuring the full process is evaluated - from the way parts are stored, to the amount of touch points an operator has to setup for the next container size.

Automation Trends:

In a fast moving, technology driven industry, **the need to automate processes on packaging machines and lines has become paramount for our customers.** Packaging line automation solutions and measurement tools for line productivity are being implemented all over the world to ensure that uptime and line efficiency is optimal.

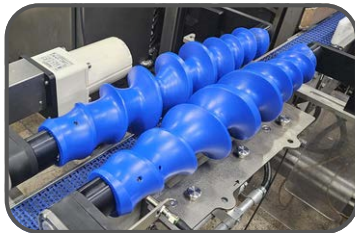

What Automation solutions does Septimatech offer?

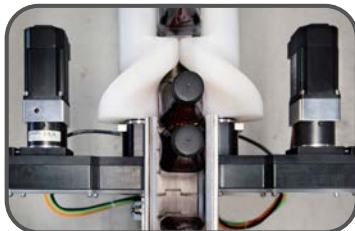

Septimatech can assist in many areas of Automation as outlined below. Automating changeover processes will increase efficiency, address labor shortages, and provide transparency of Overall Equipment Efficiency, all in a modern, fast moving pace that can keep up with industry requirements. Automating processes on your packaging line frees up your operator's time to complete other value add activities that increase throughput.

Bottle Inverter / Belt

Feed Screws

Drives

Drives

Adjustable Guide

Rails

In Summary:

Septimatech is positioned to be your changeover solutions partner as you address these trends.

The driving trends in the packaging industry we've been following outline a continuing transformative period **driven by automation, sustainability, and operational efficiency**. As manufacturers navigate the complexities of labor shortages, regulatory pressures, and shifting consumer demands, **Septimatech's commitment to precision-engineered, reliable, and adaptable solutions positions us as a key partner in optimizing packaging line performance.**

Septimatech is equipped to address these trends with innovative technologies like EASY Adjust Rails, Multi-Lane Adjust Systems, and quick change Feed Screws & Drives. **Septimatech is well-suited to help you achieve greater productivity, flexibility, and sustainability on your packaging lines.**
